Education in Minnesota

By David L. Kiehle, LL. D.

PART I. A HISTORY OF EDUCATION IN MINNESOTA.

In this part is described its early development in meeting financial difficulties and providing a permanent support. It shows how the pioneers of education engrafted the experience of the past in the new, and how they solved the new problems of the present, out of which has been established the elaborate system and the powerful institutions that now direct the education of the state.

In the appendix are given in summary form tables which show the regular increase in financial support and in enrollment of students through the last forty years of its history.

PART II. A SYSTEMATIZED SUMMARY OF THE LAWS PERTAINING TO THE MANAGEMENT AND SUPPORT OF THE PUBLIC SCHOOLS, THE STATE NORMAL SCHOOLS AND THE UNIVERSITY OF MINNESOTA.

This is a systematic arrangement of the school laws of the state by which one may see some unity in the relations of parts to each other, and form some judgment regarding the completeness of the system for its designed purpose. In this respect it becomes a study in educational law,—of principles, and more than a handbook.

It includes all the laws that are required for the general guidance of teachers and school officers, only omitting such matters of detail as apply to individual cases, and in which the original authorities would be consulted.

Price, cloth bound, 75 cents.
Part II, paper bound, 35 cents.

OUR LIBRARY DEPARTMENT, with many years of practical experience, is devoted exclusively to the requirements of **Public, University, College, School and Club Libraries,** and every endeavor is made to fill all orders completely and promptly and with the greatest care.

We carry in our stock at all times not only a more nearly complete assortment of the worthy, standard, and popular books of all American publishers than any one single house in the United States, but also a very large stock of technical and scientific books, and other books for which there is little demand, and which are not carried by general booksellers.

We are, therefore, in an exceptionally good position to fill orders direct from our stock with the utmost despatch.

We are continually receiving from our agent in London large consignments of **Foreign Books** those for public libraries being imported free of duty and we make a specialty of picking up both domestic and foreign books which are out of print, or which for other reasons are difficult to secure.

Librarians are cordially invited to correspond with us and when possible, to visit us and make use of the facilities of our store and Library Department in making their selection of books.

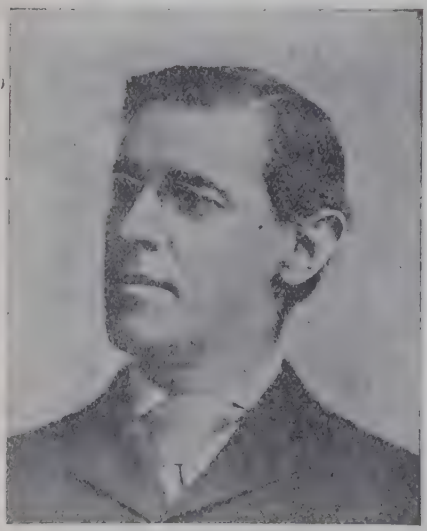
WOODROW WILSON

(Ph. D., Litt.D., LL.D., President of Princeton University)



WOODROW WILSON

A HISTORY of the AMERICAN PEOPLE

In Five Volumes

A new, epoch-making, work the only complete narrative history of the great Republic in existence today

PRESIDENT WOODROW WILSON has devoted the best years of his life to the preparation of his great work, "A History of the American People," from the earliest times to the accession of President Theodore Roosevelt. The work, which is just completed, is monumental in character and scope, represents the genius of the greatest historical writer of the present time and is written in that delightfully flowing style which translates historical facts into the romance of a nation. It is printed from new type specially cast in 1902. In the matter of illustration, every field of human activity has been searched, and hundreds upon hundreds of new portraits, prints, maps (in colors), plans, and pictures make the pictorial features alone tell their wonderful story of the finding of the continent and the birth and growth of what is the United States of America. There is a photogravure frontispiece to each volume, and portraits in India tint and black. It is a curious fact that there was not a single complete narrative history of the United States in existence until now. Dr. Woodrow Wilson's is the first. It is bound in dark-blue vellum cloth, leather-stamped, lettered with gold, untrimmed edges, gilt tops, etc. The edition is now in five volumes, and the price is $25.00.

OUR OFFER *We will send you the entire set of five volumes, charges prepaid on receipt of $1.00. If you do not like the books when they reach you, send them back at our expense, and we will return the $1.00. If you do like them, send us $2.00 every month for twelve months. On receipt of this dollar, we will send you, without cost, beginning at once, a year's subscription to either* Harper's Magazine, Harper's Weekly, Harper's Bazar, *or* The North American Review. *In writing, state which periodical you want. The Cambridge editions are all that sound scholarship can make them in the matter of text, introductions, etc. In make-up they are equally desirable, printed in large clear type on opaque paper, and bound with particular care, so that they open easily and stay open—an advantage not always found in books of their size.—*Mail and Express*, New York.

EDITED BY
MARION E. POTTER

SECOND EDITION

MINNEAPOLIS
THE H. W. WILSON COMPANY
1903

INTRODUCTORY NOTE

The second edition of the UNITED STATES CATALOG is a dictionary catalog —author, title and subject in one alphabet, whereas the first edition contained only an author alphabet and a supplementary title index. The first edition was a catalog of books in print in the United States in 1899. In the second edition have been incorporated books published between that date and January 1902, as recorded in the *Cumulative Book Index*, as well as the lists of some smaller publishers omitted from the first edition.

The date of recent books has been inserted in the author entry that reference may be made to the corresponding volume of the *Cumulative Book Index* for fuller information. The number of the edition of technical books is also given. The original portion of the UNITED STATES CATALOG which has been retained has been checked over from beginning to end with the publishers' catalogs, and changes in price and publisher have been made. Old firm names have been retained in some instances, however, as it seemed hardly necessary to reset a long list, since the Publishers' Directory at the end of this volume gives all changes of name and address. Neither was it found practicable to remove from the list the out of print books, because of the difficulty of getting sufficient information. Moreover, many of the so-called out of print books are only temporarily out of stock, while in any case it is a convenience to know the former publisher, as he is often able to advise where a supply of a certain book may be had even though he has none for sale.

An unimportant inconsistency in the style of entering biographies under subjects, the author's name following the title instead of preceding it as in other subject entries is due to the fact that these are a part of the first edition of the CATALOG.

This bibliography is supplemented and kept up to date by the *Monthly Cumulative Book Index*. The August number of the *Index* for 1903 covers the period between the UNITED STATES CATALOG and the present date and contains all the information, including descriptive notes, references to reviews, etc., which has appeared in the monthly bibliographies of the *Index*. Our cumulative system, therefore, provides a monthly supplement to the CATALOG, which shall never be in more than two alphabets and which every six months is printed in one alphabet.
